

## ActivePRINT

### Simplify Capture & Delivery of Information

ActivePRINT captures any printed output and convert it into secure, digital images. These images can be categorized, recognized by type, and sent to a specific destination. No more paper or unsecured PDF images scattered across your desktop.

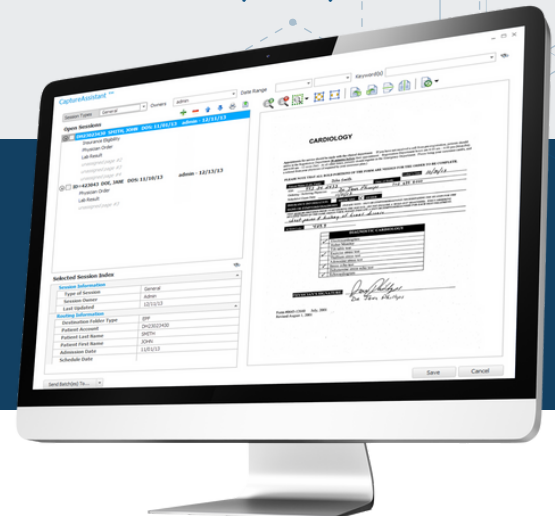

### ActivePRINT Benefits

- ✓ Eliminates the need to print hardcopy documents
- ✓ Common method to capture information from any desktop or web-based application (including payer websites)
- ✓ Allows your staff to more effectively share information between systems and internal / external users
- ✓ Manage "sessions" containing output from multiple print streams
- ✓ Assemble document sets for deliver consisting of letters, forms, scanned documents, faxes, and uploaded images
- ✓ Maintain a complete audit trail of delivered items

### Easily Print On Demand

Print directly to ActivePRINT from any application. Import documents directly from multifunction devices. Manage your "session" and create a packet for delivery. Use ActivePRINT to release electronically to any destination system.

### Common Use Cases

- ✓ Automate responses for additional documentation requests
- ✓ Simplify patient transfers to external facilities (e.g. Long Term Care, Hospice)
- ✓ Allow referral partners to submit documents directly and reduce the need to use fax to submit additional documentation
- ✓ Release items directly to core workflow solutions triggering follow-up activity or automated responses
